

Support the *STEM Fair!*

28th Annual
**Metro Richmond
STEM Fair**

March 28, 2020

MathScience
Innovation Center

Imagine. Create. Lead.

At the Metro Richmond STEM Fair (MRSF), students find their voices as members of the scientific community in a setting that nurtures their inquisitive nature. Using their research as a platform, students are able to collaborate and network with industry leaders around workforce development needs and futuristic ideas.

Started in 1992 by the MathScience Innovation Center, the MRSF has been going strong for 28 years. This robust two-level juried fair for students in grades 7-12 attracts more than 600 research projects and papers each year from students around the region.

Top winners in the Senior Division advance to the Intel International Science and Engineering Fair (Intel ISEF). Top Junior Division winners can submit their projects to the Broadcom MASTERS National Competition for an opportunity to win awards up to \$25,000. In the past four years, 13 junior division students were selected as Broadcom semifinalists, one of whom was chosen as a finalist for the 2018 competition.

Since 2002, the MRSF has sent 48 students to compete in the Intel ISEF international competition, with 32 students winning either a category or organizational award. These awards speak to the quality of the research that is being done in the Metro Richmond region.
